

GT INDUSTRIES COMMISSIONS BORUM MACHINES

Perry Theophanous delivers new Borum machines to:
Top: Craig Riley, of Image Linemarking
Bottom: Peter Haines, of Oz Linemarking

GT Industries Pty Ltd, a Sydney based roadmarking material manufacturer and Borum distributor, has recently commissioned six new roadmarking machines in Australia. Perry Theophanous, of GT Industries, made visits to each new owner giving them training and commissioning their new machines. Oz Linemarking, Rapid Linemarking, Laser Linemarking, Image Linemarking, A1 Roadlines and Allmark Linemarking Services have all now joined the Borum family of quality roadmarking machines.

Peter Haines, of Oz Linemarking has reported that they are currently working on over 600kms of Audio Tactile Centreline throughout Victoria, plus various Tactile Edgeline works.

Peter reports, "Our new Borum BMT 350 was put to work within one week of arriving in Melbourne."

"The new Uniline computer has been quite simple to program and easy to use, has increased productivity and reduced operator fatigue,"

When asked about why they selected the Borum BMT 350, Peter stated, "Service and parts availability were major factors in the decision along with proven track record with our previous BM 350 machine."

GT AT INTERTRAFFIC 2008 EXHIBITION AMSTERDAM

Together with their principal, Borum Industri A/S, GT Industries was at the 19th Intertraffic Exhibition in Amsterdam from the 1st-4th April this year.

The exhibition presented the very latest innovations in traffic and transportation infrastructure. Well over 650 exhibitors presented the world's latest trends and developments in the industry to over 25,000 professional visitors. Being a part of Intertraffic 2008 presented opportunity to meet and network with like-minded industry innovators.

Perry Theophanous, of GT Industries, co-manned the Borum exhibition stand at Stand No. 04.112 and wishes to thank all who took the time to visit and support GT Industries at Intertraffic 2008.

MAINTENANCE OF QUALITY AT GT

ISO 9001:2000 is an international standard that provides a number of requirements which an organisation needs to fulfil if it is to achieve customer satisfaction through consistent products and services which meet customer expectations. GT Industries has been third-party accredited to ISO standards since 2002 by SAI Global (previously Standards Australia) and passed their recent triennial audit with flying colours. This indicates the high level of commitment GT Industries has to maintaining their quality management system in order to satisfy the needs and specifications of their clients.

GT Industries is also accredited by the Australian Paint Approval Scheme (APAS) as a recognised manufacturing unit, and has waterborne roadmarking products APAS approved. This product approval reflects the quality of the waterborne paint produced meeting strict APAS specifications. The quality management team is currently busy in preparations for their upcoming APAS audit for renewal of their status as a recognised manufacturing unit.

GT BUS LANES

GT Industries Cold Applied Plastic product, Roadplast Roll On, together with their Coloured Aggregate is currently widely used for application on bus lane projects around Sydney.

Jimmy Lei, of GT Industries, reported that they have increased their manufacturing capacity to supply GT Roadplast Roll On, and Coloured Aggregate material for the Lane Cove Tunnel Project in Sydney, allowing its completion in a timely manner.

For further information about GT Industries or their products call (02) 9829 4275 or send an email to gtind@ozemail.com.au or check out their website at www.gtindustries.com.au.
